THE TREATMENT

Before you begin it is essential to do a patch test 24 hours before use. Test a small amount of the Treatment Serum on the inside of the wrist just to make sure your skin doesn't react in anyway.

When you are ready, clean the skin and hold your hair back off the face with the hair band. Apply a generous covering of the Treatment Serum and leave for about 10 minutes. Turn the unit on and place the tip of the wand directly against the skin. Moving the wand slowly over the skin in a circular or up and down motion.

Focus on the areas you wish to improve most, such as wrinkles or crows feet. Treatment of the whole face should take about 10 minutes.

You can change the intensity of the treatment. Unless you have sensitive skin you should aim to use higher settings for maximum effect.
